

Portable Light Fitting Tester

The ALS Light Fitting Tester has been designed to provide a safe and simple method for testing both LED and Halogen AGL fittings. The light fitting tester enables any incandescent lamp from 30W to 200W, or an LED fitting that uses a 6.6A supply, to be tested at about 4A before it is installed. The test takes 15 seconds and with a fully charged battery, over 200 tests can be carried out before recharging is required, this provides a cost effective solution for both commissioning and maintenance. Approximately 200 tests can be carried out on a Full charge.

Specification:

- Output: - 3.5 - 4 Amps
- Charging via: - 230 – 240VAC 50/60Hz @ 700mA or 12 VDC vehicle charger.
- Operating Temperature -20°C - +55°C

Features:

- Ergonomic design
- Portable and robust
- Light Weight
- Tests both halogen and LED fittings
- Supplied with both mains and car charger

Applications:

- Testing Luminaires prior to installation
- Testing Luminaires on site, without having to take back to a workshop
